

Sure Grip Anti-Skid Additive

COURSE OR FINE

PRODUCT DESCRIPTION

Sure Grip is a lightweight, optically clear, polymeric particle that stays suspended in most clear or pigmented coatings. **Sure Grip** is used as an additive where the surface may become slick due to the application of the coating.

FEATURES AND BENEFITS

Sure Grip can be directly poured and mixed into the desired coating or it can be broadcasted on top of freshly applied surfaces where maximum slip resistance is desired. **Sure Grip** can be added to latex, oil-based, or epoxy coatings. **Sure Grip** particles are spherical shaped to ensure a less abrasive slip resistant surface. **Sure Grip** also has a high solvent resistance.

COVERAGE RATE

Approximately 3.2 oz. per gallon of coating. One 16 oz. **Sure Grip** bottle is designed to be poured into a 5 gallon pail of your desired coating.

***Available in Course or Fine**
