

SURFACE SOL

Surface Sol

CONCRETE SURFACE RETARDER (RED OR GREEN)

PRODUCT DESCRIPTION

Surface Sol is a water soluble liquid retarder for concrete surfaces which is used to expose the aggregate in the concrete surface.

FEATURES AND BENEFITS

Surface Sol is easily applied with a pump sprayer and its water soluble nature assures uniform coating on the surface. Simply apply to concrete and then cover with plastic to avoid drying of the surface, then allow the concrete to set to desired depth before washing to obtain exposed aggregate concrete.

COVERAGE RATE

Approximately 100-150 sq. ft. per gallon

***Available in 1 Gal or 5 Gal**

USES & APPLICATIONS

- Porches
- Walkways
- Sidewalks
- Driveways
- Patios
- Vertical Surfaces
